<div class="ebd-block " data-type="text" ><p>We're constantly pushing the boundaries to
bring you the best experience possible—and now, we're thrilled to introduce some major
improvements in DeepLiveCam 2.1!</p><br><strong data-redactor-tag="strong" data-
verified="redactor"> ♦ Face Enhancer Speed Boost</strong> - Enjoy up to a 50% increase in
FPS when adjusting the face enhancer! While we still recommend caution until CPUs/GPUs
become more powerful (yes, even with a 5090, we're hitting just 9fps), this is a game-
changer for those looking for faster rendering.<br><br><strong data-redactor-tag="strong"
data-verified="redactor"> ♦ Smarter Face Masking</strong> - We've fine-tuned face masking to
render only the important parts, giving you an extra 10% speed boost (roughly 1 to 2fps).
<br><br><strong data-redactor-tag="strong" data-verified="redactor"> ♦ Introducing Face
Generator</strong> - Need a fresh identity? Generate faces on the fly in less than 3 seconds
with our latest addition. It's quick, seamless, and brings a whole new layer of
customization!<br><br>This is just a preview of what's to come—stay tuned for even bigger
updates ahead!</div>
